RE: Questions Pertaining to the Inspection of 4/19/15

Ron,

The most recent Form R that I could find was for the 1996 reporting year (submitted July 1997). The chemical cited was Captan CAS# 133-06-2. We apparently were repackaging the stuff. In 1996 we were only warehousing the leftovers as the repackaging was discontinued.

Honig Chemical and Processing Corp. no longer uses either Hydrochloric Acid nor Sodium Nitrite. I don't ever recall the use of Sodium Nitrite. HCl was only warehoused here at Honig as a holdover from years past, since discarded.

M: Rotunno Can you tell me the last time you filed for the Toxic Release Inventory and what were the chemicals. The TRI # that you gave us was 07105HNGCH414WI. Also send me e-mail stating that you no longer use Hydrochloric Acid and Sodium Nitrite. If you have any questions you can call or e-mail me.

Thanks Ronald Wienckoski
